### Specification

It is suggested to submit the cited references on pages 24 and 25 on an Information disclosure statement 1449.

### Abstract

1. Applicant is reminded of the proper language and format for an abstract of the disclosure. The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details. The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

It is suggested not to use the word "the invention" in the abstract. Also, the abstract must be in a single paragraph. Appropriate correction is required.

### Claim Objection

2. Claims 12, 13, 15, 17 are objected to because of the following informalities: it is suggested not to use numerical numbers such as 1), 2), 3) etc in the steps of a process as disclosed in the claims rather use alphabetic letters such as a), b), c) etc. to indicate

Art Unit: 2819

the steps. This will create confusion as the claims are already numbered. Appropriate correction is required.

3. Also, it is suggested to write "claim1" in claim 15 as – claim 1 -.

4. Moreover, steps 3, 4 are numbered in claim 15 while steps 1, and 2 are not numbered. Appropriate correction is required.

#### Allowable Subject Matter

5. Claims 1 – 24 are allowable.

6. Reasons for allowing the aforementioned claims will be provided in the next office action.

#### Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

8. Mitchell et al. (US Patent Number 4,891,643) discloses an arithmetic coding data compression/Decompression by selectively employed, diverse arithmetic coding encoders and decoders.

9. Berger et al. (US patent Number 5,973,626) discloses a byte-based prefix encoding.

10. Kimura et al. (US patent Number 6,075,471) discloses an adaptive coding method.

11. This application is in condition for allowance except for the formal matters mentioned above.
